Front Panel

Rear Panel

Side Panel

Preparation

1.Connecting Internet cable

Connect Ethernet cable to the 'Ethernet' Port of the rear panel of the box.

2.Connecting the TV

Connecting TV via HDMI cable.

3.Power ON/OFF

There are several ways to turn the box ON or OFF.

●Complete Power Shutdown

Remove the power supply, it takes a longer time to boot the system if you turned it off by this way.

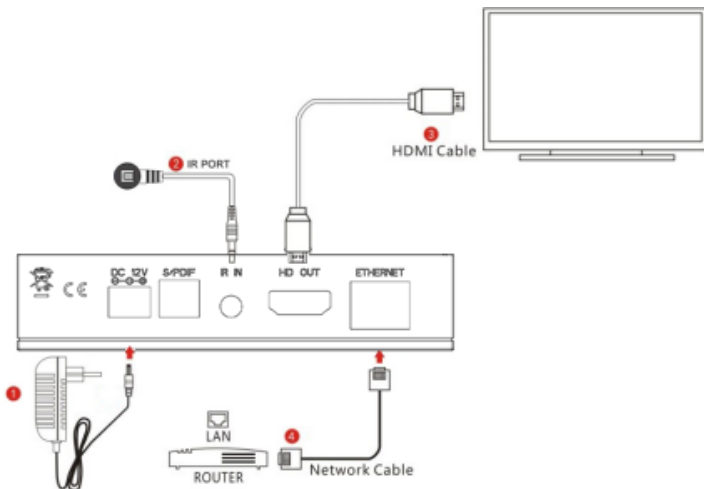

●Standby Mode

Press the **POWER**  button to turn the box on or off.

The box includes a standby mode for lower power consumption which locates at

[Setting >System Options>Real standby].

If **Real standby** set to **OFF**, the system is not completely shutdown and thus it takes a few seconds to restart.

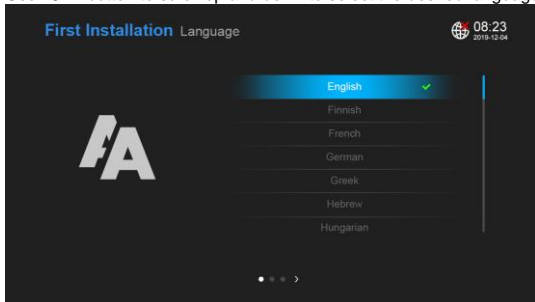

First Time installation

When you switch the box on for the first time, the easy installation starts automatically with the language selection.

1. Language Selection

Use **▲▼** button to scroll up and down to select the desired language and confirm with **OK** button.

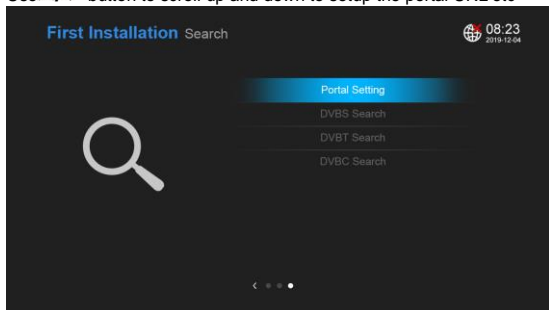

2. Press ► button to go to next region setting.

Use **▲▼** button to scroll up and down to select the desired time zone and confirm with **OK** button.

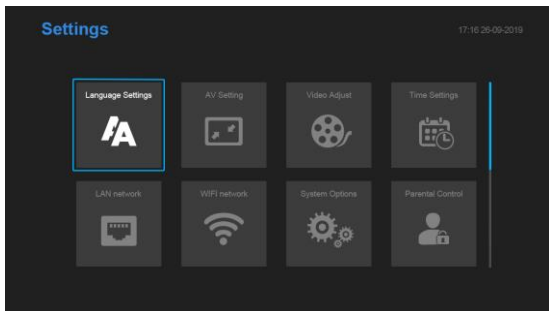

3. Press ► button to go to next search setting.

Use ▲▼ button to scroll up and down to setup the portal URL etc

4. Full Settings Menu.

After installation guider, you can enter the Settings menu through Main menu and set everything what you may need.

Specifications

Main Processor	Cortex-A53 QUAD CORE 1.6G CPU

Network	LAN: 100Mb
WIFI	802.11 b/g/n 2.4G WIFI
USB	One USB 2.0 host and One USB 3.0
HDMI	VER1.4b
Operation Temperature	0°C~+45°C
Storage Temperature	-10°C~+70°C

Trouble shooting

Before you contact your local service center, please read the following tips carefully.

1. No video on TV

- Check first if the product is powered on and in operational mode.
- Check if the video cable is properly connected between TV and the box.
- Check if the internet cable is properly connected between Router and the box.

2. Problem with audio quality

- Check if your audio cable is connected correctly.
- Check the volume level of your TV and the box.
- Check if the box or TV is on mute.
- Check the audio option if it is correctly selected for the program that you are currently watching.

3. Poor audio and video quality

- Check if the internet cable is properly connected between Router and the box and the internet bandwidth is enough.

4. Remote control problem

- Check if the battery is low power.
- Point the remote control directly toward the box.
- Make sure that nothing blocks the front panel display.

5. Recording problem

- Check if the HDD has a sufficient space for recording.
- Check if there is a conflict between recordings.
